The logo for Doha Cables is displayed in white on a red background. The word "DOHA" is written in a large, bold, sans-serif font. Below it, a thin horizontal line separates "DOHA" from "CABLES", which is also written in a large, bold, sans-serif font. A white curved line, resembling a smile, is positioned below the word "CABLES".

CHAIRMAN'S MESSAGE

Qatar's economic growth story over the last few decades has been remarkable. The country has become one of the world's fastest growing and most successful economies as markets diversify and infrastructure develops. Since its foundation, our Company has contributed to and benefited from Qatar's development. We have achieved sustainable growth in a number of key sectors and helped the country diversify away from traditional oil and gas income streams as the significant infrastructure and industrial investment programme set out in the Qatar National Vision 2030 has driven economic growth.

Against this background, Aamal Company, one of the region's largest diversified companies, has launched major industrial ventures in Qatar and successfully positioned itself as a predominantly industrial enterprise. Aamal's scale and diversification give us a distinct advantage in attracting world class multinational companies which see us as the partner of choice for entering the Qatari market. We seek to form long-term strategic relationships in which such companies provide the requisite technical knowledge, brand and products whilst Aamal provides the necessary local market knowledge and skills on the ground.

A major example of which we are proud is "Doha Cables". It is a significant step towards achieving our goal of building market-leading positions in high growth sectors and meeting the increasingly sophisticated demands of the Qatari market. The Doha Cables plant was established in 2010 and has made a material contribution to Qatar's industrial sector by helping to satisfy rising demand for cables stemming from rapid infrastructure development.

We are uniquely positioned to offer comprehensive and well-balanced exposure to Qatar's growth, encouraged by government support for the private sector under the wise leadership of His Highness the Emir, Sheikh Tamim Bin Hamad Al Thani.

HE Sheikh Faisal Bin Qassim Al Thani
DOHA CABLES Chairman

VISION 2030

Positioned as the first cable manufacturer in Qatar, Doha Cables provides the Qatari market with a new dimension supporting the country to maintain significant yet sustainable economic development, contributing its share and achieving goals of Qatar National Vision 2030.

VISION

To become Qatar's number 1 hub in providing electrical products and solutions.

MISSION

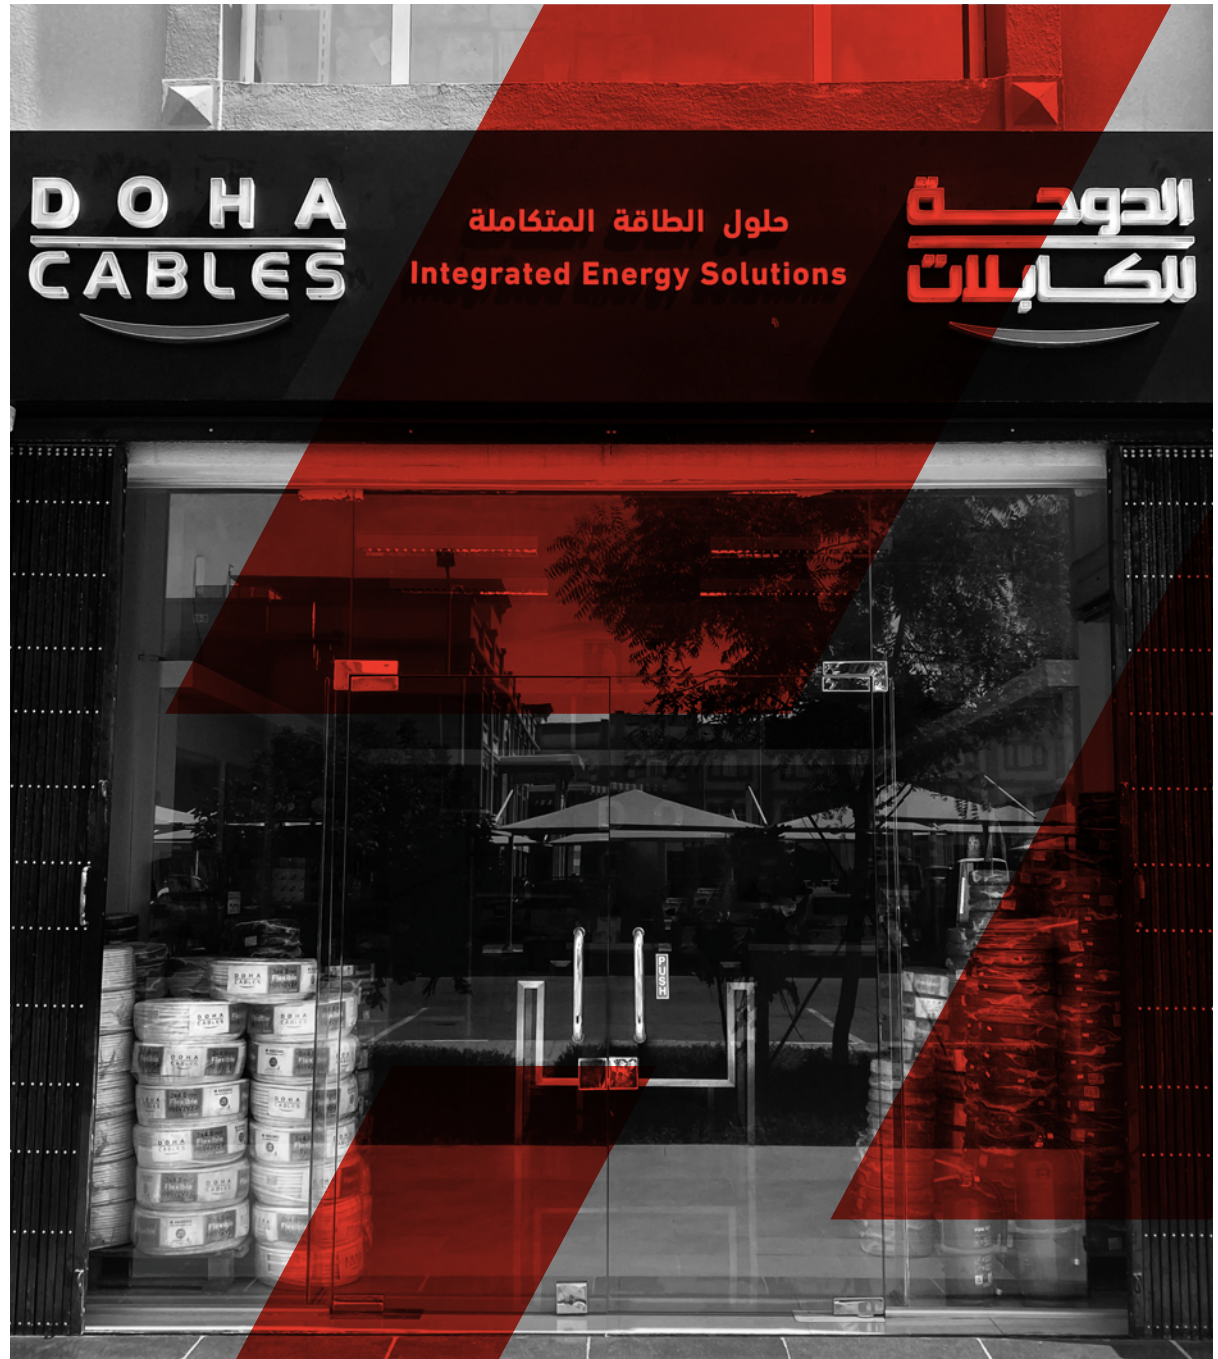

To deliver the best electrical solutions with exceptional expertise and to bring incomparable customer satisfaction.

DOHA CABLES TRADING DIVISION

As part of Doha Cables mission, which is to exceed the market expectation, it was only a matter of time for Doha Cables to expand its outstanding offerings. In 2009, DOHA CABLES has started its journey in the State of by establishing state of art grass-root cables and wires manufacturing facilities and one of most modern of its kind. In 2019, Doha Cables celebrated its 10-year anniversary with pride but also with a vision towards the future and determination to lead the industry and to expand its offerings for the next 10 years. Doha Cables Trading division was established to fulfil that part of our ambition. An ambition not to only lead the cables and wires industry, but to also provide and bring non-cable electrical solutions to the next level.

Doha Cables Trading Division (DCTD) has partnered up with the best manufacturers in their field. Today, Doha Cables can proudly provide its clients products such as PVC/METAL Isolators, Ceiling Roses, Copper Bus Ducts/Bars, Cable Lugs & Glands, G.I Conduits & Flexible rigid Conduits, Wiring Devices and Cable Management under one roof. With the vision locked in our DNA to become Qatar's number 1 hub in providing electrical products and solutions, this is just the beginning for a fruitful and successful journey.

Through our experience and dedication, we here at DCTD will aim to provide you with all the required product knowledge, technical support/advise and dedication to serve you with professional excellence.

DOHA CABLES

DOHA CABLES has started its journey in State of Qatar in year 2009 by establishing state of the art manufacturing facilities and one of the most modern of its kind. Doha Cables is a subsidiary of leading business conglomerate – AAMAL Group.

DOHA CABLES has well-equipped manufacturing facilities spread across 70,200 m2 area in the south of Qatar, at Mesaieed Community Area. It has been growing multi-dimensionally over the last decade to evolve as a most advanced cable producer with latest technology and by delivering products having world class quality standards.

In a very short span, Doha Cables with its capable, well experienced man-power & visionary leadership has made a leading position in cables by offering complete range of all kinds of cables starting from Low Voltage up to Extra High Voltage (up to 220kV) along with special range of cables such as Fire Resistant, Low Smoke Halogen Free(LSHF), Bonding and many special purpose cables meeting National and International Standards. Doha Cables has obtained International Certifications & approvals for its products from recognized certification bodies like BASEC, UK/LPCB, UK/KEMA, Netherlands/BV/DNV-GL etc...

Doha Cables can also offer additional TURNKEY solutions for Cable Laying, Jointing, Termination, Testing, Engineering and site services for HV & EHV underground cables up to 400kV.

ISKRAEMECO powers business decisions with an impeccable solution portfolio and a passion for sustainability. Our comprehensive solutions and turnkey services meet countless market demands, providing energy companies the tools to forge the future of energy generation and management in a digitalized world. From IoT expertise to digitalizing data flows, Iskraemeco makes it easy to use energy. Smart solutions, smarter services, brilliant business – Iskraemeco.

- **3 knowledge hubs in Slovenia, India and Egypt**
- **5 regional manufacturing facilities and service hubs**
- **100 million meters installed**
- **1,500 employees**

PROJECTS

- KAHRAMA -QATAR
- MEW - Kuwait
- Grid Company JSP – Russia

PRODUCT RANGE*

ELECTRICAL METERS – KWH

ELECTRICITY METERS. A wide array of advanced products can all be connected to smart grids and applications. Whether they are intended for residential or industrial environments, smart or prepayment products, customized or turnkey solutions - our diversified portfolio was built to last.

SOFTWARE Solutions Data streams are meaningless without powerful tools to manage and analyse them. Our specialized software platform and extensive program suite were built from our decades of experience. Our experts will happily help you maximize your data.

- SMR5 – Netherlands
- HEP – Croatia
- EHC- Oman

COMMUNICATION PRODUCTS Great meters in smart, modernized utility grids of the future are just the beginning. The data they collect must then be communicated, as quickly, accurately, and securely as possible, to a central exchange. Iskraemeco's tools and accessories turn data into meaningful communication.

SERVICES Iskraemeco's rich portfolio of services supports every step of your project. Our expert teams are specialized in design, deployment, maintenance, and key upgrades. With us as your partner, your infrastructure is transformed into the powerful tool that you need in order to focus on what you do best.

by Honeywell

At MK we pride ourselves on using superior manufacturing techniques in all our manufacturing sites. All MK products are manufactured from superior quality materials to ISO 9002 certification. Whilst other manufacturers may make claims on reliability MK products are truly reliable, we demonstrate this with comprehensive product guarantees of up to 20 years. MK's operating systems work towards continuous improvement, ensuring the standards are maintained and improved. The latest statistics (2008) showed that less than 1 product per 1,000,000 sold was found to be faulty (that is less than 0.001%). The MK investigation response team have a target of 5 working days to deal with any issues and bring the case to a resolution. All MK products undergo rigorous testing to ensure maximum Quality, Reliability and Safety. Each product undergoes 100% electrical and visual testing at the point of manufacture.

British Standards require a socket outlet to be tested to 25,000 socket insertions – the MK test laboratory has tested MK sockets to over 1,000,000 plug insertions with no reported faults, or issues with wear and tear. Similarly, British Standards require a switch to be tested to 25,000 switches, the MK test laboratory has tested MK switches to over 1,000,000 on-off switch operations with no reported faults, or issues with wear and tear.
